Julia subtyping

vendredi 10 juin 2022 10:00 (50 minutes)

Have you ever wondered how Julia dispatches method calls? As an answer, have you been pointed to a mysterious .c file in the source tree understood by at most five people on Earth? Are you afraid of complex type annotations? If yes, do not wonder anymore. This talk will be a friendly walkthrough across the rules that govern subtyping, the relation at the very core of method dispatch.

Orateur: Dr ZAPPA-NARDELLI, Francesco (Research Scientist, Meta)
