What's new in HiGHS

jeudi 5 octobre 2023 09:00 (30 minutes)

HiGHS is the world's best open-source linear optimization software, and has had a good and valuable relationship with the JuMP community for several years. This talk will present the recent developments in HiGHS. In particular it will give a progress report on new interior point solver, and set out the motivation for its development.

Orateur: HALL, Julian (University of Edinburgh)

Classification de Session: JuMP & OR
