Mission de One Identity

Protéger et simplifier l’accès aux identités numériques afin de rendre l’expérience utilisateur plus sûre et plus sécurisée

ONE IDENTITY

One Identity, un ADN européen

Siège européen à Cork, Irlande. Une présence des développeurs produits au sein même de l'Europe (Allemagne, Hongrie, France, Espagne, Angleterre…), pour des clients européens qui représentent la majorité de nos clients.

70 ETP

Notre bureau de Cork, Irlande en est le siège.

78%

de notre développement produit se concentre dans la région EMEA. Visitez notre centre de Budapest, Hongrie, par exemple.

45%

de notre revenu annuel — $130M+ — provient de clients de la zone EMEA.

One Identity - Internal

Most companies are ill-equipped to close this

Cybersecurity Exposure Gap

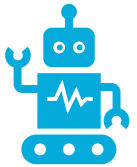

Millions of users
internal, external and customers

+

Ever-expanding accounts
legacy, cloud, hybrid, edge

+

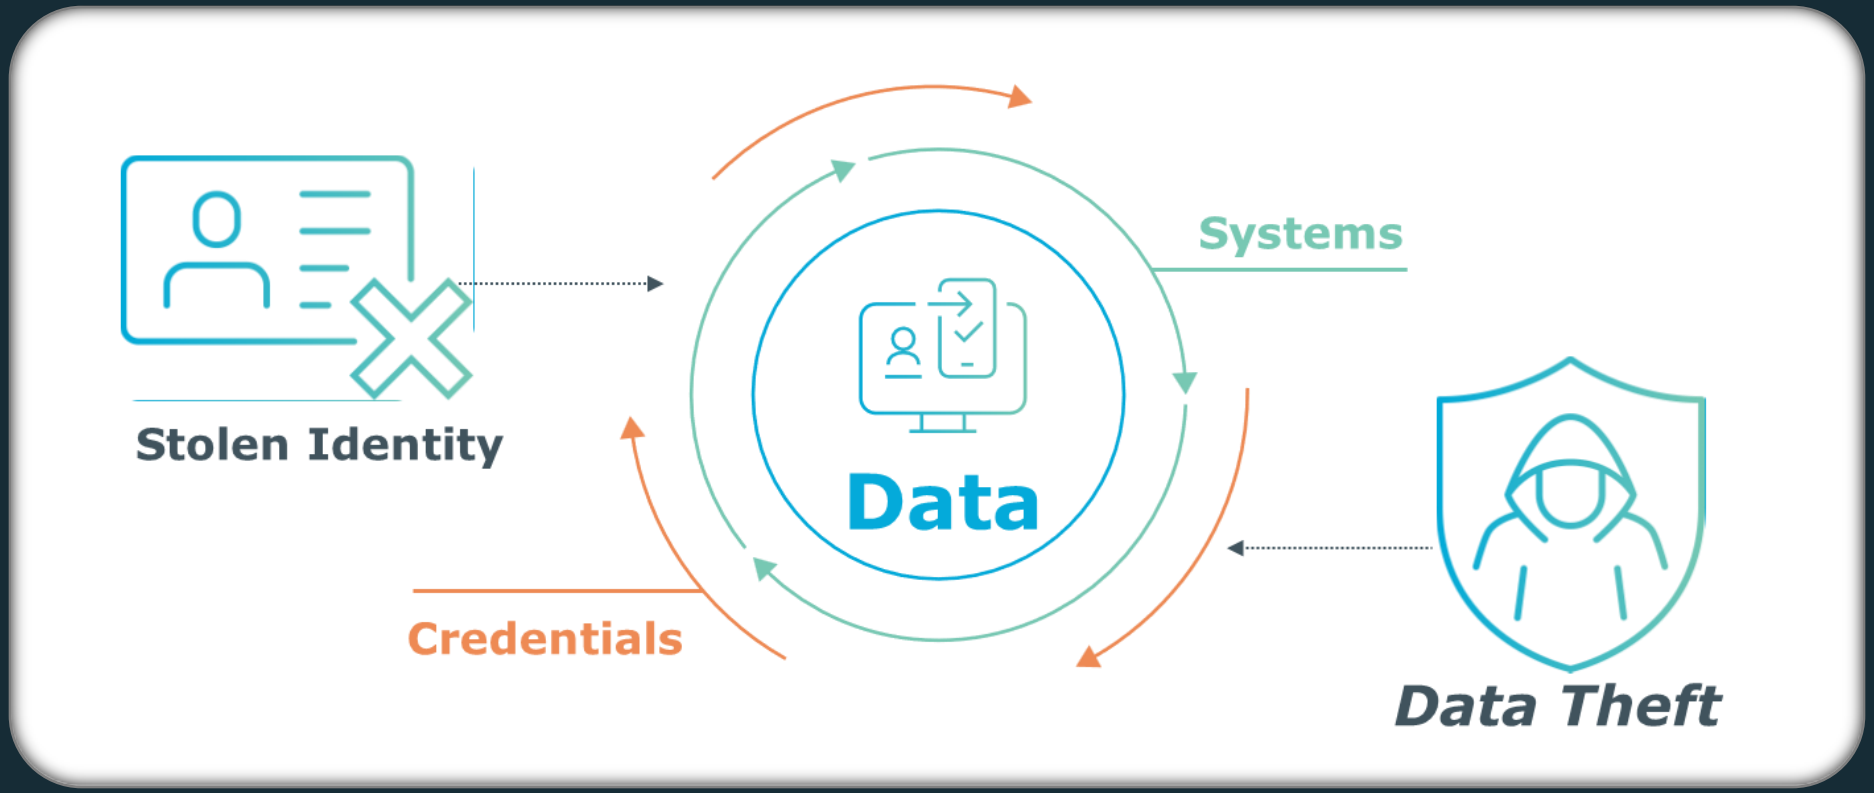

More machines than humans
everything instrumented

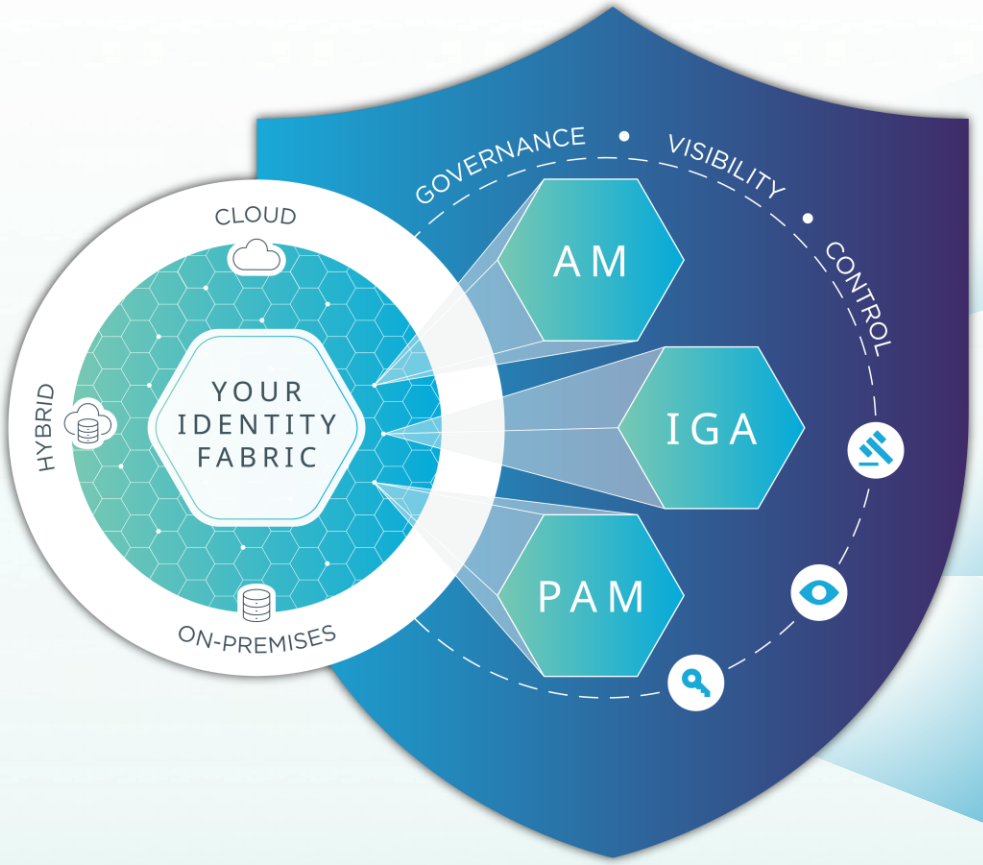

Identity Sprawl

Your Data is the target

Your identities are the access point

One Identity | Secure your Enterprise

AM

Access Management

- Authenticate users
- Simplify access with Single Sign-On
- Secure workforce, customer, and partner identities

IGA

Identity Governance Administration

- Govern Identities and Delegate Privileges
- Manage Policies and Automate Workflows
- Audit and Compliance
- Provision Enterprise

PAM

Privilege Account Management

- Manage Privilege Sessions
- Privilege elevation for Sudo & Mac
- Vault Privileged Passwords
- Analyze Privileged Threats
- Enforce Least Privileged Access

ONE IDENTITY

Unified Identity Fabric

To close the security exposure gap CISOs and security executives must shift from a fragmented to a **unified, integrated, optimized cybersecurity platform.**

***"Credential compromise** was the number one attack vector for cybersecurity breaches 2021–2025*"*

Cornell University

Challenges

- Bringing consistency to a highly distributed and diverse AD environment
- Protecting University data from AD based attacks
- Eliminating human error and misuse of AD Admin credentials

Solution

One Identity Active Roles

"Active Roles provided several key features right off the bat including delegation and sub-delegation, naming convention enforcement, change history and enforcing policies for AD objects."

Muhammad Arif, Identity Management, CIT – Cornell University

University of Basel

Challenges

Manual processes for requesting and managing access required measurable ongoing effort by students, staff and associates, creating frustration, long wait times and security risks.

Solution

The university built a flexible, self-service access portal and standardized digital processes with One Identity Manager that automate access requests, simplify approvals, and improve insights and controls.

"We had a vision and instead of starting with a shiny PowerPoint presentation, we brought it to life with Identity Manager. We now have a solid, central portal to provide selfservice access for all our employees and associates."

Alexander KessingerTeam Leader, Identity and Access Management, the University of Basel

University of Basel
